Eric,

Here is the updated Proposed use statement for the barn at 5010 Butler Rd. I have also attached a drawing of the barn. The size is still 30'x50'. They still want a more of a peak roof. To keep it under the 22' height requirement we came up with a 9/12 pitch. That would give an over all height of 21.25'. The tusses are going to be just standard truss design, no attic truss. The attached paperwork does not have the truss design yet, but should have later next week some time. Thank you
