Eric,

Yes, kind of, I have been bugging our engineer to keep in contact with DOH. To give you a little review DOH explained that she has been overloaded with applications to review and would get to ours around end of October. She looked at it then asked engineer for some more info which he provided a week after that. I asked for an update a few days before the Nov 14 meeting with you and was not ready yet. I asked again last week for a status report. The engineer inquired and they then asked for some more input from him, DOH received that today. I asked if it could be possible to have a determination before your Dec 12 meeting, the engineer said he would make that request but couldn't speculate on success. I apologize for the delays, I am frustrated DOH is taking so long. I hope our application with the Town doesn't expire or anything like that. Realistically I am not holding my breath DOH will get this out in time for the planning bd to review before Dec 12 but hope so. I'll keep you informed. Let me know if you need anything else from me. Thanks

Casey
