Subject: RE: March 8th Referral Listing

Carla,

35-2017 – General highway related comments about the application are as follows:

1. Applicant will be required to obtain a County highway work permit for all proposed work in CR 10 right-of-way; and
2. Traffic Impact Study (TIS) is required for this project; we've preliminary discussions with applicant's engineer (McFarland Johnson) on scope of TIS; and
3. Drainage study is required for the project

Town of Canandaigua has set me a set of plans, prepared by BME associates, for the project. Based on backlog of work assignments, I'm a couple of weeks away from reviewing the plans submitted by the Town. In addition, no engineering report, TIS, or drainage study was provided by the Town. This lack of complete information will only extend the review period.

I've had some preliminary discussions with John Berry about the project's impact to Canandaigua Lake Sewer District and expect John to provide comments shortly.

If you have any questions, please contact me directly.

Thanks

Timothy G. McElligott, P.E.
Professional Engineer
