### 2. Applicant:

### 3. Property Owner (if different from the applicant):

Edwin and Margaret Jefferies

### 4. Tax Map #:

### Project Description:

Area variance for height and site plan application for construction of 1,338 SF addition to residence at 3754 CR 16 several parcels north of the water treatment plant.

**Referral Recommendation:** The CPB will make no formal recommendation to deny or approve.

This 1.1 acre lot is bisected by CR 16. This application involves construction of a 2-story lake side addition and a single story road side addition to a 1½-story residence on the upland portion of the lot. The existing building and additions meet all setback, building coverage, and impervious surface coverage regulations of the Town of Canandaigua. While requiring a height variance of 3 feet from the 25 foot limit, the 2-story lake side addition roofline is actually slightly lower than the ridgeline of the existing 1½- story building.

**Policy AR-5:** Applications involving one single family residential site, including home occupations.

The intent of this policy is to:

1. Address residential development that may infringe on County ROW's or easements for roads and other infrastructure.
2. Address traffic safety along intermunicipal corridors by encouraging proper placement of residential driveways along County roads.
3. Address impacts to ground and surface waters

**Section C - All other applications subject to policy AR-5.**

**Final Classification:** Class 1

### Findings:

1. One-and two-family residential uses represent 63% of the 49,354 parcels on the 2017 Ontario County assessment roll. Between 2012 and 2017 1,067 single family residential parcels were added and 13 two-family were removed. These parcels represent 89% of all parcels added county-wide.
2. Collectively individual residential developments have significant impacts on surface and ground water.
3. Proper storm water and erosion control is also needed to achieve that same end.

4. These issues can be addressed by consulting appropriate agencies during local review and ensuring that those standards are met.
5. The applicant and referring agency are strongly encouraged to involve Ontario County Soil and Water Conservation District as early in the review process as possible to ensure proper design and placement of on-site septic.
6. The applicant and referring agency are strongly encouraged to involve Canandaigua Lake Watershed Manager as early in the review process as possible to ensure proper design and implementation of storm water and erosion control measures.

**Comments:** The town should grant the minimum height variance necessary.

**Final Recommendation:** The CPB will make no formal recommendation to deny or approve.
