Eric,
I have noticed the 'Application Pending' sign on the Day property. For years I have watched the Japanese Knotweed flourish adjacent to the road on the Day parcel and extending south onto the Chessin's lot to the south. This invasive (talk to Ryan) is one nasty weed and a real bitch to get rid of and the homeowners may be oblivious to its existence. Most of it is probably in the County's right of way but if the applicant wants to modify their driveway & parking area perhaps you can suggest to their landscaper to round up some Roundup to get rid of it or perhaps the County would be responsible??
Sorry for meddling but thought the land owners should be aware of this if they aren't already.
Tom
