

According to OnCor, the portion of the lot east of Sandy Beach Drive is in the floodplain.

Policy AR-5: Applications involving one single family residential site, including home occupations.

The intent of this policy is to:

- Address residential development that may infringe on County ROW’s or easements for roads and other infrastructure.
- Address traffic safety along intermunicipal corridors by encouraging proper placement of residential driveways along County roads.
- Address impacts to ground and surface waters

C. Applications subject to policy AR-5 and not involving lakefront lots with coverage, or side or lakefront setback variances or with encroachments on County right-of-ways.

Final Classification: Class 1

Findings:

1. One-and two-family residential uses represent 63% of the 49,354 parcels on the 2017 Ontario County assessment roll. Between 2012 and 2017 1,067 single family residential parcels were added and 13 two-family were removed. These parcels represent 89% of all parcels added county-wide.
2. Collectively individual residential developments have significant impacts on surface and ground water.
3. Proper design off on-site sewage disposal is needed to protect ground and surface waters.
4. Proper storm water and erosion control is also needed to achieve that same end.
5. Proper sight distance at access points along County roads is an important public safety issue of county wide significance.
6. Standards related to protecting water quality and traffic safety have been established by agencies such as the American Association of State Highway and Transportation Officials (AASHTO), and NYSEDC.
7. These issues can be addressed by consulting appropriate agencies during local review and ensuring that those standards are met

Final Recommendation – With the exception of applications involving lakefront properties involving side, lake, or lot coverage variances or encroachments to County owned right-of-ways described in AR Policy 5 Parts A and B, the CPB will make no formal recommendation to deny or approve applications involving one single family residential site, including home occupations.

Comments

1. The Town is encouraged to grant only the minimum variance necessary to allow reasonable use of the lot.
2. The applicant and referring agency are strongly encouraged to involve Ontario County Soil and Water Conservation District or Watershed Manager as early in the review process as possible to ensure proper design and implementation of storm water and erosion control measures.

OCDPW Comment If addition impacts lateral service connection for this property, site plan must be submitted to OCDPW and permit may be required.

5 - 2021	Town of Canandaigua Zoning Board of Appeals	Class: AR 2
Referral Type:	Area Variance	
Applicant:	Architectural Innovations	
Property Owner:	Chessin, Daniel & Rina	
Tax Map No(s):	140.18-1-5.000	
Brief Description:	Area variance to expand a deck by 350 SF and convert a portion to a screened porch at residence at 4847 CR 16 just south of Deuel Road in the Town of Canandaigua. The deck has proposed 51' rear (lake) setback when 60' is required.	

According to OnCor the majority of the lot has slopes of 16 to 30 percent and the shoreline and area south of the house have slopes of 31 to 60 percent.

Policy AR 5 Applications involving one single family residential site, including home occupations.

Part B Development of Lakefront Parcels.

- B. The following applies to all development on parcels with lake frontage that require;
- variances pertaining to lot coverage or,

- variances pertaining to side yard setbacks or,
- variance pertaining to lake shore setbacks

The CPB's role of reviewing and making recommendations on county wide development has provided a unique perspective on the trend of more intensive development and use of lakefront lots. Of particular concern are the incremental negative impacts to water quality and the character of our lakefront neighborhoods. The following policy is a result of discussion and debate spanning 18 months as well as consultation with outside agencies directly involved with water quality issues in Ontario County. The intent is to address over development of lakefront lots and support the clearly stated interest by local decision makers to do the same.

Final Classification: 2

Findings:

1. Protection of water features is a stated goal of the CPB.
2. The Finger Lakes are an indispensable part of the quality of life in Ontario County.
3. Increases in impervious surface lead to increased runoff and pollution.
4. Runoff from lakefront development is more likely to impact water quality.
5. It is the position of this Board that the legislative bodies of lakefront communities have enacted setbacks and limits on lot coverage that allow reasonable use of lakefront properties.
6. Protection of community character, as it relates to tourism, is a goal of the CPB.
7. It is the position of this Board that numerous variances can allow over development of properties in a way that negatively affects public enjoyment of the Finger Lakes and overall community character.
8. It is the position of this Board that such incremental impacts have a cumulative impact that is of countywide and intermunicipal significance.

Final Recommendation: Denial

Comments

1. The referring body is encouraged to grant only the minimum variance necessary to allow reasonable use of the lot.
2. The applicant and referring agency are strongly encouraged to involve the Canandaigua Lake Watershed Manager as early in the review process as possible to ensure proper design and implementation of storm water and erosion control measures.

6 - 2021	Town of Victor Planning Board	Class: 1
Referral Type:	Site Plan	
Applicant:	Venezia & Associates	
Tax Map No(s):	26.00-1-13.100	
Brief Description:	Three lot subdivision of 41 acre lot along Strong Road south of Taylor Road in the Town of Victor. https://www.co.ontario.ny.us/DocumentCenter/View/26962/6-2021-Aerial https://www.co.ontario.ny.us/DocumentCenter/View/26961/6_2021-Subdivision	

Subdivision to create a 7 acre and an 8.5 acre lot east of Strong Road and a 36 acre lot west of Strong Road.

According to OnCor, the rear portions of all 3 lots have slopes of 16 percent or greater. There is a stream crossing in the southwest corner of lot 1 in an area of 31 to 60 percent slope. OnCor does not indicate any areas of wetlands or floodplains. Primary soil characteristics are as follows:

<u>Artport fine sandy loam,</u>	3 - 8 %	5.2 acres	8-15%	29 acres	check this category on explore area
Prime Farmland					
Permeability: high			Erodibility: high		
Hydrological Group A			Not Hydric		
<u>Palmyra Gravelly loam,</u>	15 to 25 %		6.4 acres		
Not Prime Farmland					
Permeability: high			Erodibility: medium		
Hydrological Group B			Not Hydric
