Re: CPN-18-078
Happiness House – Phase 3

Dear Mr. Finch:

We have reviewed the revised plans for the above-referenced project dated August 12, 2016, with a latest revision date of November 11, 2017 and received in this office on November 30, 2018. We previously found the plans to be in substantial conformance with the minimum standards for sanitary sewer construction established by the Canandaigua Lake County Sewer District, and have found the revised plans to be in conformance as well.

Because the previous approval was granted in June 2017, we wish to remind you that prior to commencing construction, the applicant will be required to obtain a sewer extension permit. Prerequisites for said permit include the following:

- NYSDEC approval and provision of DEC approved/stamped plans.
- Receipt of proposed sanitary sewer easement maps and descriptions.
- Provision of the engineer's estimate for sewer main and lateral installation.
- Receipt of engineer-approved shop drawings for manholes, frames & covers, pipe and fittings.

Lastly, we wish to remind the applicant that the site is situated outside the boundaries of the Canandaigua Lake County Sewer District, and that Out of District User Agreements will be required prior to making the lateral connections to each building.

If you have any questions I may be reached at (585) 396-4049.

Sincerely,

A handwritten signature in dark ink, appearing to read "J.D. Braun".

John D. Braun
Junior Engineer, CLCSD
