Planning Board

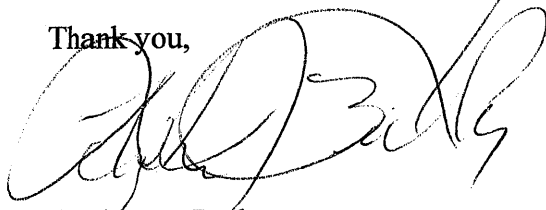

Canandaigua, NY 14424

Planning Board Members:

We recently received the Notice of Public Hearing for Canandaigua Country Club's proposed Subdivision approval.

It is our understanding that the application is being done so that the Country Club will qualify for a different classification under the Dock and Mooring Laws. We are opposed to the proposed change for a number of reasons: 1) the change could allow the country club to install an abundance of boat slips 2) the change could allow the club to operate as a marina 3) there is already an abundance of unwanted vehicular traffic on our private drive which would be exacerbated by this change 4) it is an unsuitable and inappropriate use for the area 5) there is already an overabundance of boat traffic at the north end of the lake 6) additional dockage will have a deleterious effect on the environment 7) additional docking creates an attractive nuisance for perching of seagulls and ducks 8) additional dockage could also lead to unsightly storage of boat trailers.

Thank you,

Stephen R. Butler
