Eric,
My wife and I showed up at the RGE "balloon-fest". I attached a few pictures despite a windy day. We are opposed to this because we do not want something falling on us. What if it falls on the substation and wipes out power? They do NOT have enough land not to mention it is an eyesore. We are also confused about the mast / tower of 100 feet and something else sitting on top. What is the total height of what they want? Sounds like RGE is being sneaky.

Thanks,

Russell C. Meszler
