Subject: FW: barn replacement

Doug,

We are requesting to use the elements of the barn and put it at the entry of our subdivision. I gave you a quick rendering from our architect of the design. The picture enclosed is the look we will be trying to aspire to. I think it is a better idea because it will give the building more exposure at the entry of the subdivision. I am very concerned with the existing structure. I don't think the foundation/footer could be properly repaired. The more we look at the structure the more concerned we get. The mendonites could do the work but no one can guarantee that the structure would be sound. Let me know when this could be discussed with the planning board.

Thanks,

Scott Morrell
