Subject: MINK BARN floor plan
Attachments: MINK BARN_04_07_16.pdf; ATT00353.txt

Doug:

Attached is a PDF of 4788 Barn floor plan. This will confirm my assertion that the design and plan for the renovation of the barn is to be essentially a master bedroom plus a den. This number of bedrooms (2) will be the minimum required for the Canandaigua Watershed for septic design by Grove engineering.

I ask that you present these plans to the ZBA so as to satisfy their demand for plans of the barn proposal. And, at this time it is a proposal, and without any variances or subdivision plans granted by either the ZBA , nor the Planning Board , I believe I should not be obligated to present signed architect plans at this time. Am I correct in this matter?

Please confirm what my requirements should be at this time. And, I greatly appreciate your efforts should you be able to help shepherd my VARIANCE request further in the process. I can be available for the August 16 ZBA meeting, and would like to be on the agenda if the attached plans will acquiesce the demands set forth by the ZBA.

Sincerely,

Bruce Mink
