Full Environmental Assessment Form Part 1 - Project and Setting

Instructions for Completing Part 1

Part 1 is to be completed by the applicant or project sponsor. Responses become part of the application for approval or funding, are subject to public review, and may be subject to further verification.

Complete Part 1 based on information currently available. If additional research or investigation would be needed to fully respond to any item, please answer as thoroughly as possible based on current information; indicate whether missing information does not exist, or is not reasonably available to the sponsor; and, when possible, generally describe work or studies which would be necessary to update or fully develop that information.

Applicants/sponsors must complete all items in Sections A & B. In Sections C, D & E, most items contain an initial question that must be answered either "Yes" or "No". If the answer to the initial question is "Yes", complete the sub-questions that follow. If the answer to the initial question is "No", proceed to the next question. Section F allows the project sponsor to identify and attach any additional information. Section G requires the name and signature of the project sponsor to verify that the information contained in Part 1 is accurate and complete.

A. Project and Sponsor Information.

Name of Action or Project:		
Aegis Solar, LLC		
Project Location (describe, and attach a general location map):		
5932 Monks Road, Canandaigua, NY 14424 (Tax ID: 153.00-1-72.310)		
Brief Description of Proposed Action (include purpose or need):		
Cypress Creek Renewables, LLC is proposing to construct an approximately 2,000 k above and illustrated on the attached map.	W solar photovoltaic array system	n on a portion of the site described
The project will consist of ground-mounted, solar photovoltaic panels in a fixed-tilt tra- posts approximately 6-10' into the ground, or at depths appropriate for frost conditions	cking configuration. The constructs, every 12-16' and mounting par	ction of the system will involve driving nels racks to the posts.
The solar farm will operate as a Community Distributed Generation (CDG) facility as the electric tariffs of Rochester Gas & Electric. As a CDG facility, the project will provi Gas & Electric and offer local customers the opportunity to contract for this energy at	ide clean energy to the existing e	e Public Service Commission under electric grid operated by Rochester
