The U.S. Fish and Wildlife Service (Service) has reviewed the project information submitted December 9, 2016, for the Cypress Creek Renewables, Aegis Solar, LLC Site, City of Canadaigua, Ontario County, NY. Given the project description and location (no known maternity roosts within 150 feet or hibernacula within 0.25 miles) of the project, any "take" that may occur incidental to this project is not prohibited under the final 4(d) rule.

No further coordination with the Service is required pursuant to the Endangered Species Act of 1973 (ESA) (87 Stat. 884, as amended; 16 U.S.C. 1531 *et seq.*) for this project. Should project plans change, or if additional information on listed or proposed species or critical habitat becomes available, this determination may be reconsidered. The most recent compilation of federally-listed and proposed endangered and threatened species in New York is available for your information. Until the proposed project is complete, we recommend that you check our website every 90 days from the date of this letter to ensure that listed species presence/absence information for the proposed project is current.\*
