I'm in need of some help!!!! On Tuesday August 22nd the town of canandaigua is holding a meeting at 6:30pm at town hall. While this picture doesn't do it justice, our neighbor is trying to push through a solar field complete with trees which planted are at least 12' and grows 70+'.....all to feed the power station below and line his pockets. That would eliminate the view and drastically reduce the property value while also taking away agricultural land. If you are willing and able to attend the meeting to speak out against this it would be greatly appreciated. I'm all for solar power as well as the rest of my family and neighbors but the guy has plenty of room to place the field else where on his property where it would not disrupt anyone's view and overall be out of sight out of mind....problem is he doesn't want to pay to run the cable to the power station. Any help in the form of attendance or letters would be helpful! Just make sure your from canandaigua ☺
