**Subject:** Planning Board Condition of Site Plan Approval/signatures 4691 N. Menteth Drive Canandaigua, NY  
**Attachments:** FW: Cuvelier septic, 4691 N. Menteth Drive (331 KB)

Eric,  
My client Greg Cuvelier has closed on the property at 4691 N. Menteth and is anxious to move forward with construction of his new home. Obviously the Planning Board has set a condition of their final approval and signature on the site plan of final Ontario County and DOH signatures on a final septic design. I believe the main driver of that condition was Tyler Ohle's initial comment to the Town to be cautious in approval of the site plan until the septic system was reviewed and approved. Tyler made that statement prior to seeing any design concept from Grove Engineering. I spoke to Tyler earlier this week on his current position. He stated that although he has not seen Bill Grove's final design he did review the design in concept development phase and as noted in his email to Bill, attached, the "conceptual design looked good".  
Tyler forward his email to me understanding that I would be forwarding it to you as record of his more current stance on the design. I've also spoken to Bill Grove who is confident in a final approval from both Ontario County and DOH of the proposed septic system.  
My concern is in waiting for final signatures on the septic we will lose the Fall construction season. I'm hopeful that in light of Tyler's comments that the Planning Board would consider modifying their current condition of signed septic plans prior to their signature of the site plans to a condition requiring signed septic plans prior to a Certificate of Occupancy for the dwelling which is a more normal condition set for a new single family home project.

Please advise,  
Jim
