Subject: Re: Height of Garage Doors for Proposed Building

Eric,

The building will be used strictly for automotive and boat storage (cold storage). There will be no utilities to the building with the exception of one electric circuit run from another building to provide lighting in the structure.

Because we are a property management company we have vehicles and equipment (snowplow, trailers, etc.) we want to be able to store inside as we feel such things stored away out of sight enhance the overall esthetics of a property.

Sincerely,
Marty Potter

Marty,

Thank you. As I discussed with Chuck last week, there is no issue regarding the garage door height. It was merely a transcribing error that can be disregarded moving forward.

However, we do need a statement regarding the proposed use of this building. Can you please tell us what this building will be used for?

Best,

Eric A. Cooper

Good Morning Eric,

Chuck wanted to let you know the height of the garage doors on the proposed new building @ 5290 North Street will be 25 feet.

If you have any questions you can call Chuck on his cell (585-303-0256).

Sincerely,
Marty Potter
