RE: Canandaigua Veterans Housing- Letter of Intent

Dear Mr. Finch:

Attached please find revised Site Plans for the Canandaigua Veterans Housing project. The plans were revised based on input from the Town Engineer and NYSDEC. Specifically, the following modifications were made to the stormwater management area:

1. An additional infiltration area was added in the north end of the pretreatment area at the request of the Town Engineer.
2. A forebay was added at the inlet to the pretreatment area based on input from the NYSDEC.

Although neither of the features was originally required as part of the initial approval, the applicant has agreed to add them as an enhancement to offset the proposed stone lining. Please note that the NYSDEC did confirm that the stone lining is an acceptable practice in the pretreatment area as currently installed. Please review the attached materials and contact me directly with any questions.

We look forward to meeting with the Board on the 29th.

Sincerely,

A handwritten signature in black ink, appearing to read "Jess Sudol".

Jess D. Sudol, P.E.
