Importance: High

Hi Kelley- This needs to be uploaded to the 2022-007 on Thursday, 5/5. The email from Craig Jensen also needs to be included. Thanks!

Shawna,

Attached please find the images for our Sketch Plan Presentation developed to date.

As I mentioned earlier to Glenn, we will be expanding on this prior to the meeting next Tuesday with schematic concepts of the individual building types including:

1. Mixed-use buildings
2. Residential walkups
3. Three story townhouses
4. Two story townhouses
5. One Story Patio homes

We are also looking at least three other building types (variations on the above) to increase the overall diversity and visual interest of the development and to add richness to the public realm.

We look forward to discussing concepts at this early stage in the project's development in an effort to benefit from the Board's input.

Please contact me with any questions or concerns.

Thanks,

Craig

Glenn,

How late today can we submit the architectural concepts for Uptown Landing.

As discussed, now that we have good direction and momentum, we will be augmenting our submission with additional detail prior to the meeting date.

Thanks,

Craig

No problem. However, I feel bad that it has taken us so long to prepare for this important first step.

Hi Glenn-

Thank you for the update and how exciting!

Because we are so early in the process, i.e. Sketch Plan, getting those architectural tomorrow won't be an issue.

Any more detailed conceptual plans you have are welcome as well and the sooner the Board can look, the more substantive the comments will be to move forward with.

Thanks for getting back to me so quickly,
Shawna

Shawna

I just got off the phone with Craig Jensen of CJS Architects, the new team architect. If you aren't familiar with their work, CJS Architects recently designed the new YMCA which will soon be under construction. They have also designed many of the new residential and mixed use buildings, and Strong Museum expansion along Union Street in Rochester as a part of the Inner Loop closing.

We have met with CJS on numerous occasions and they have offered much experienced based counsel and will have building concepts ready for electronic submittal tomorrow. Those concepts will be refined over the next week so that more detailed plans can be presented at Tuesday's meeting. I hope that this schedule is acceptable to the Town.

Hi Glenn- Just checking in as we did not receive any elevations/architectural drawings for Uptown.

What is the status of the sketch at this point? Thanks!
