Eric-

Per our conversation, attached are the updated elevations of 3542 Sandy Beach. The primary changes that have been made from the previous submitted are as follows:

- The addition elevation height was increase 2'-8" +/- above the existing roof line.
- Dormers were removed from the existing roof area.
- Elevation reference datum were added - finish grade; finish floor; existing and new roof line elevations. ( which I also believe this was a comment from MRB ).
- West elevation was added to drawing- only scope here is replacing existing doors and windows.

I can have hard copies delivered to the Town as necessary.

Please let me know if you have any questions.

Respectfully,  
Jay H-M
