

# SOIL EROSION AND SEDIMENT CONTROL PERMIT APPLICATION

(Standards Approved by Town of Canandaigua, NY Guidelines for Urban Erosion and Sedimentation Control)

## ON-SITE INSPECTION REQUIRED PRIOR TO THE ISSUANCE OF A BUILDING PERMIT

Date: 11-16-21

Property Owner Name and Address: Martin E. & Lori Gilmore

2701 Short Rd NEWARK NY 14513

Telephone / Fax # 585 455 3493 E-mail address: marlor@rochester.ny.com

Site Location: 5039 Seneca Point Road

Size of Site (Acres/ Sq.Ft.): 13.3 AC Tax Map Number 153.00-1-15.22

Description of proposed activity: Single Family home

| Per Chapter 165 §165-10-B, at a <u>minimum</u> , the map, plan or sketch prepared shall include the following:   | Shown on Plan<br>Yes / No | Initial Review | Follow Up Review |
|--|---------------------------|----------------|------------------|
| 1. Boundaries of the subject parcel and other parcels adjacent to the site which may be materially affected by the action.   | ✓                         |                |                  |
| 2. Existing features including structures, roads, water courses, utility lines, etc. on the subject parcel and on adjacent parcels where appropriate.  | ✓                         |                |                  |
| 3. Existing vegetative cover including wooded areas, grass, brush, or other on the subject parcel and on adjacent properties where appropriate.  | ✓                         |                |                  |
| 4. Limits or extent of excavation, filling, and/or grading proposed to be undertaken.  | ✓                         |                |                  |
| 5. The disposition of soil and top soil, whether on site or off site, and the locations of any stockpiles to be placed on site.  | ✓                         |                |                  |
| 6. Temporary and permanent drainage, erosion and sedimentation control facilities including ponds, sediment basins, swales, energy dissipation devices, silt fences and/or straw bale locations. | ✓                         |                |                  |
| 7. The location of proposed roads, driveways, sidewalks, structures, utilities and other improvements.   | ✓                         |                |                  |
| 8. Final contours of the site in intervals adequate to depict slopes and drainage details on the site.   | ✓                         |                |                  |

| Per Chapter 165 §165-10-B, at a <u>minimum</u> , the map, plan or sketch prepared shall include the following:  | Shown on Plan<br>Yes / No | Initial Review | Follow Up Review |
|---|---------------------------|----------------|------------------|
| 9. A time schedule indicating:  |                           |                |                  |
| a. When major phases of the proposed project are to be initiated and completed;   | NA                        |                |                  |
| b. When major site preparation activities are to be initiated and completed;  | NA                        |                |                  |
| c. When the installation of temporary and permanent vegetation and drainage, erosion and sediment control facilities is to be completed; and  | ✓                         |                |                  |
| d. The anticipated duration (in days) of exposure of all major areas of site preparation before the installation of erosion and sediment control measures.  | NA                        |                |                  |
| Other Information Required to be Provided:  | Shown on Plan<br>Yes / No | Initial Review | Follow Up Review |
| 10. What is the general topography and slope of the subject property (in %):<br>SW corner to NE.  | 10-11%                    |                |                  |
| 11. How much area (in square feet) and/or volume (in cubic yards) will be disturbed?<br>42099.19 SF   | ✓                         |                |                  |
| 12. Does the subject property drain offsite? <input checked="" type="checkbox"/> Yes No<br>If yes, where does it drain to and how will it affect offsite properties?<br>1000' +/- to the north east |                           |                |                  |
| 13. How will erosion be controlled on site to protect catch basins from silt?   | NA                        |                |                  |
| 14. If sedimentation basins are proposed, where will they overflow to if they become clogged? Describe:   | NA                        |                |                  |
| 15. Is there any offsite drainage to subject property? <input checked="" type="checkbox"/> Yes No<br>If yes, where does the drainage come from? Road  | ✓                         |                |                  |

| Other Information Required to be Provided:  | Shown on Plan<br>Yes / No | Initial Review | Follow Up Review |
|---|---------------------------|----------------|------------------|
| 16. How will off site water courses be protected?<br><hr/> <p style="text-align: center;">Silt fence</p> <hr/> <hr/>  | ✓                         |                |                  |
| 17. How will any adjacent roadside ditches or culverts be protected during construction? <hr/> <hr/> <hr/>  | NA                        |                |                  |
| 18. Has the appropriate highway superintendent been contacted?    Yes    No<br>Name of the person contacted and date contacted:<br><hr/>  |                           |                |                  |
| 20. Is existing vegetation proposed to be removed?    Yes <u>No</u><br>(If yes, the vegetation to be removed must be identified on the plan.)   |                           |                |                  |
| 21. Will any temporary seeding be used to cover disturbed areas? <u>Yes</u> No<br>If yes, a note shall be added to the plans.   |                           |                |                  |
| 22. What plans are there for permanent revegetation? Describe:<br><hr/> <p style="text-align: center;">Once all site improvements are complete<br/>all disturbed areas are to be seeded within<br/>7 days</p> <hr/> |                           |                |                  |
| 23. How long will project take to complete?<br><hr/> <p style="text-align: center;">4 months</p>  |                           |                |                  |
| 24. What is the cost estimate to install and maintain erosion and sedimentation control facilities before, during, and after construction?<br><hr/> <p style="text-align: center;">\$1921.98</p>                    |                           |                |                  |
