Subject: FW: Miller Subdivision Drainage District

During the preliminary approval process of the subdivision.. please make the Board aware of this request to dissolve the Miller Subdivision Drainage District.

It was originally created so that the Town would maintain the Stormwater Infrastructure. No funds have been collected and there is no balance.

With the MS4 program and the new Stormwater Regulations.. the HOA will be responsible for maintaining the stormwater infrastructure (after they close out the project.. file the Notice of Termination with the DEC and file a Maintenance Agreement)

Subject: Miller Subdivision Drainage District

Doug, this correspondence is to confirm that after a discussion at its August 13, 2019 meeting the DAC recommended to the Town Board the dissolution of the Miller Subdivision Drainage District that was created in 2007 in anticipation of The Miller subdivision. The development was never constructed at the time and therefore the funding to support the drainage infrastructure was never collected or needed then or in the future. Thank you for your consideration of this recommendation.

Chuck
