

C-Head Compost Toilets - c-head.com

- Portable Toilets; urine diverting; urine and solid waste are kept separate.
- Solid waste collected in a carbon medium material, ie sawdust, cat litter, peat moss. Can hold 2-3 weeks of waste before discarding.
- Urine collected in a gallon water jug and is discarded as level indicator shows full.

Discarding Waste –

- Solid waste is discarded in a compost bin for later use as flower garden soil.
- Urine is either combined with 6 parts water and used for flower bed irrigation or the toilet can pipe to a holding tank for later disposal by sanitation company.

On line Information.

- Sandy Graves, inventor of c-head explains system in a utube interview found on C-Head Website.
