Subject: Sunset Ridge Proposal

As a property owner and significant tax payer, I write to express my concern about this latest proposal before the town. There seems to be ongoing evidence that insufficient concern is being shown for the natural environment, already at great risk in the rising greed for new homes in our area. While I realize that my own position as a little cottage owner might seem self serving and hypocritical, I do try to serve the common good and the earth in responsible ways. We do already have significant runoff problems in the wetland that cause regular flooding of our lakeside property, and there do not seem adequate storm water management plans for this development. This threatens the vulnerable wetlands below the land, and seems to be every bit as disregarded as the concern for present trees and native vegetation on the hillside that mitigate flooding naturally. Given our human propensity to pollute wherever we go, the eventual use of pesticides on yards on the hill is a very real concern.

Please do not permit this development to proceed! And make my concern part of the official record on this matter. Thank you.

As we move forward into an unknown future, let us seek hope instead of despair, peace instead of anger, joy instead of complaining, love instead of hate.

Rev. Margaret Scott
