Re: Proposed Residential Development – Thomas Road at Brickyard Road – Town of Canandaigua

Dear Mr. Bianco:

I am working as engineer for the developer of the subject land parcel who wishes to create the proposed development as depicted on the enclosed 24" x 36" concept drawing.

We recently presented this project to the Town of Canandaigua's Planning Board for initial comments. One comment was received from Ontario County IDA and expressed concern relative to possible bird strikes on aircraft flying to and from the Canandaigua Airport, which is near the proposed development site. We acknowledge that with a proposed pond for storm water control, waterfowl may be attracted to the identified pond location. We are willing to explore other storm water control and treatment means and techniques but anticipated clay based soils tend to limit viable and practical alternatives to ponds. Reference is made to the Town of Canandaigua's regional detention area near Parkside Drive and storm water ponds serving the Centerpointe Golf Club area.

At the mentioned planning board meeting, it was judged worthwhile to contact your agency and solicit comments in this regard. Planning board member Bob Lacourse provided us with your name as the appropriate contact person. So we would very much appreciate your input and guidance that would be shared with the planning board. If there are applicable FAA regulations regarding residential developments such as this proposed development, we would most appreciate knowing so, and what restrictions may be applicable.

We would also appreciate hearing back from you by December 9th if possible because we are returning to the planning board for further discussion of this project on December 10th.

Thank you in advance for your assistance in this matter. Please feel free to contact me should any questions arise, or should additional information be needed or helpful in your review.

Very truly yours,

PROFESSIONAL ENGINEERING GROUP
