

Transfer Station Planning, notes from Planning & Public Works Committee meeting 3/5/21:

1. Permits- ensuring facility is only used by Town of Canandaigua residents.
2. Fees- explore user fee-based programs with County. Explore permit fees vs PAYT programs.
Compare weight based PAYT programs with per bag or other type fees.
3. Traffic safety- both within the facility, as well as entering/exiting facility.
4. Signage/way finding- information about where collection points are within the facility and what can be accepted.
5. Staffing- hard to find staff willing to work part-time, long term, in sometimes harsh conditions.
Also need staff to be knowledgeable about collection programs.
6. Study hours of operation for new facility.
7. Public education- continuing education about various collection programs and upcoming changes to operations.
