Attn: Chris Jensen, Code Enforcement Officer

**Re: Section 1 of the Villas @ Canandaigua
Final Site Plan Modifications
(T.A. #097.002-0002.020.111)**

2186A

Dear Mr. Jensen:

On behalf of Wegman Companies, Inc., we submit the enclosed plans and materials for the Planning Board's consideration of modifications to the original Site Plan approvals. We are requesting to appear at your July 24, 2018 Planning Board meeting agenda, and we have enclosed two (2) copies of the following application materials:

- Revised Stormwater Management Plan and Details, BME drawing #2186A-15A
- Revised Section 1 As-Built Record Map, BME drawing #2186A-39

The revised stormwater management plan shows the existing decorative boulders around the existing pond. The boulders were not shown on the originally approved plans, however, the developer is proposing to leave them on site as they were part of the previously constructed development phases.

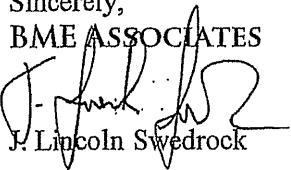

This plan also included re-construction of the overflow from the decorative ponds – the proposed Rip-Rap Lined Channel is to be installed per the original design and approved plans.

We have also attached an updated as-built record map per MRB's letter dated May 11, 2018. The map was updated to show the boulders around the pond, as well as the lateral connection to the catch basin near D-1. The other pipe connections to that catch basin referenced in MRB's letter are the typical gutter weep pipes.

If you require any additional information for your July 24th meeting, please contact our office.

Thank you for your consideration.

Sincerely,
BME ASSOCIATES

J. Lincoln Swedrock
