Eric,

I have no significant concerns with this project. A couple comments for consideration are:

1. Silt fencing on the north and south sides of the lot should avoid being a continuous line perpendicular to the contours of the site. This has the potential to create concentrated flows along the surface of the fence. Consider using smaller segments that direct water back towards the natural swales and drainage paths.
2. Although the project is in a historically sensitive area, this project is likely exempt under Section 428.12 as the construction of a single family house on a single lot. It is still recommended that Josalyn Ferguson of the State Historic Preservation Office be consulted to verify if any action is required. She can be reached at Josalyn.Ferguson@parks.ny.gov or 518-268-2218.

Regards,

Luke
